Providing Traffic and weather reports is an important public service and I can think of no reason to stop XM from providing these services. I would think that the FCC would be 100 % behind this sort of community service. It is a case of an industry trying to buy protection of it's worn out old line product. The FCC needs to stand up for the people...that is your function. Just Say No to the AM/FM lobbyist and Yes to the freedom of choice that makes America work so well.
